I belong to a Bhatti family and my all family is well educated. I was married to an unknown person that was arranged by my parents after completing my studies. My husband is also a teacher by profession. I was treated best after some days of my marriage but as time passes, it was turned into rude behavior due to joint family. I was punished daily and also do mentally torture to me every day in the way of abuses. They were totally greedy family. They love only to my pay and to my all “**JAHAIZ**”. Near about one and half years I bear the situation, when it was over then I turned back to my parent’s home. Here I met to Miss Uzma where she is the member of “**WE CAN**”. She told me about the organization its working and its Mission Statement. I fill up the change maker’s forum and I also became a member of “**We Can**”.

Here I felt that I may get help and told to every person that how much torture I bear. I will try my best to remove the discrimination, violence, and mentally torture on the plate form of “**We Can**”.

*Now she is working for the victim women like her in her community and village.*

She thinks that the violence that has been gifted by her husband and husband’s family will be minimized. She is a regular member of “**We Can**”.
