

## **SAJID MAJID**

Mr. Majeed has masters' degree in International Development and more than 16 years of experience in development management, with focus on design, implementation and monitoring of development programs. Part of his work has addressed issues of institutional reforms and re-examination of their programs and role, including formulation of a new vision and institutional changes to improve effectiveness in contributing to development impact. The development and application of results based monitoring and evaluation frameworks tailored to the specific needs of operational managers and the strategic requirements of organization has been a key feature of his work. He has also played major role in strategic planning, baseline studies, programme management and appraisal at senior level.

### **Role/Responsibilities**

He leads Planning Monitoring & Evaluation (PME) unit of SAP-PK and his key responsibilities are to;

1. Help in developing strategic plan and future initiatives of the organization.
2. Oversee development and functioning of the organization wide performance monitoring system to support management oversight and decision making.
3. Develop monitoring indicators and performance measurement framework of various projects
4. Conduct M&E exercises for assessing relevance, efficiency and effectiveness of projects.
